Technology Engineering

This program is designed for middle and high school students to explore all cluster areas AND the careers available within them. They will apply basic knowledge gained from various projects and activities to the appropriate cluster area. They will learn teamwork, problem solving, design process, and technology literacy. Students will also gain hands-on experience in using technology in activity-based courses.

Gateway

This program is designed for middle school students to explore one or more of the 10 different curricular topics related to a specific cluster area and will be exposed to the careers available within that area. Students in this program, in every topic, will learn teamwork, problem solving, design process, and computer modeling. Students will also complete hands-on projects and activities related to the topic of study.

Course Descriptions Guide

Middle School Courses

CESI Pathway: SC000 Science, Technology, Engineering and Mathematics Exploratory

8971 Architecture & Construction Exploration – ¼ to 1 unit (CESI: ST00292)

Exploring *Careers* in designing, planning, managing, building and maintaining the built environment.

8971 Green Architecture (Gateway) – ¼ to 1 unit (CESI: ST00139)

In this course, students learn how to apply green concepts to the fields of architecture and construction. They explore dimensioning, measuring, and architectural sustainability and apply what they have learned to design affordable housing units using 3D architectural design software. This course is designed for 6th – 8th grade students.

8972 Arts, A/V Technology & Communications Exploration – ¼ to 1 unit (CESI: 00293)

8830 Engineering Exploration – ¼ to 1 unit (CESI: ST00289)

Exploring a future in the Engineering and Technology pathway, students should study and apply principles from advanced mathematics life sciences physical science, earth and space science, and technology.

8830 Automation and Robotics Exploration (Gateway) – ¼ to 1 unit (CESI: ST00088)

Students learn about the history and impact of automation and robotics as they explore mechanical systems, energy transfer, machine automation, and computer control systems. Using the VEX Robotics® platform, students apply what they know to design and program a variety of objects.

8830 Design and Modeling Exploration (Gateway) – ¼ to 1 unit (CESI: ST00085)

Students discover the design process and develop an understanding of the influence of creativity and innovation in their lives. They are then challenged and empowered to use and apply what they've learned throughout the course to design unique products.

8830 Gateway Exploration – ¼ to 1 unit (CESI: ST00276)

Students experience different units in different Gateway courses during the course.

8830 Magic of Electrons Exploration (Gateway) – ¼ to 1 unit (CESI: ST00086)

Students examine the behavior and parts of atoms as well as the impact of electricity on the world around them. They learn skills in basic circuitry design and use what they know to propose designs such as an alarm system.

| Science, Technology, Engineering and Math Core Courses Grade 6 – 8 | | Pathway: SC000 STEM Exploratory |

Program Requirements

CAREERTECH STUDENT ORGANIZATIONS

All CareerTech teachers must have an active CareerTech Student Organization. TSA is the student organization that aligns to STEM.

PROFESSIONAL DEVELOPMENT

Teachers new to CareerTech attend new teacher training to become familiar with CareerTech and network with other STEM teachers.

CareerTech teachers annually attend Oklahoma Summit, a collaborative conference planned by OkACTE and CareerTech.

STEM COURSES

CareerTech STEM programs teach STEM-approved courses and schools report all courses using 8000 level codes.

REPORTS

- 412 funding STEM 315
- Salary and schedule September
- CESI Student enrollment, October
- Student completion Seniors follow-up, November
- OCAS codes 8000
- CTIMS <https://ctims.okcareertech.org/CTBDSWeb/>

FUNDING

- STEM Program 412 annual funding Equipment, supplies, professional development
- STEM Teacher 411 annual stipend
- Lottery grants Receive every other year
- Innovative grants Opens every two years

ADVISORY COMMITTEE

CareerTech Programs must hold at least one advisory committee meeting each year. The committee should help with curriculum and equipment decisions.

GEAR UP FOR YOUR FUTURE

Middle School Events and Careers

CHOOSING COMPETITIONS

TSA's program of activities enhances student education through its STEM-based competitions, which promote work-based learning and hands-on experiences. Competitions can be integrated easily into the classroom curriculum, or they can be used as an additional resource for career pathway initiatives. Through TSA's competitions, student members have the opportunity to develop real-world skills, strengthen their leadership abilities, and explore career opportunities.

The competitions listed below are grouped in categories. However, some competitions could fit into multiple categories. To see the careers associated with each competition, go to <https://www.oktsa.org/competitive-event-information> and click on the name of the competition you are interested in.

Middle School: Competitions

Architecture and Construction Technology

Discover a career in aviation and aerospace

Home to aerospace pioneers such as Wiley Post and Clyde Cessna, Oklahoma has a rich legacy of aerospace innovation dating back more than a century. Today, Oklahoma continues to serve as a hub of aerospace innovation, as some of the world's most successful aerospace companies choose to run major operations in the state. Aerospace companies and organizations are looking for qualified personnel in every sector of the industry, including aircraft maintenance, unmanned aerial systems and general aviation. These videos highlight the value of aviation and aerospace training and the rewarding careers it can lead to. Enjoy!
